DETAILED ACTION

Because of applicant's amendments to the drawings, the drawing objections of the prior office action have been withdrawn.

Specification

1. The disclosure is objected to because of the following:
 - The abstract of the disclosure is objected to because it contains legal terminology, e.g. "comprises". See MPEP § 608.01(b).

Appropriate correction is required.

Claim Objections

2. Claims 5 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim (claim 3). See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim is indefinite because of the following reason: "the central and outer portions" lack antecedent basis.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 1-4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tuitt (U.S. 4,427,125) in view of ordinary skill in the art OR in view of Wetsler (U.S. 1,353,104).

Tuitt teaches a stainer that includes a plurality of incisions 17 about its periphery, integral interlocking pull tabs 12

and cutouts 11. Tuitt doesn't teach the cutouts 11 to be crescent-shaped but such is considered to be within ordinary skill and a matter of design preference. See *In re Dailey*, 357 F.2d 669, 149 USPQ 47 (CCPA 1966). Alternately, such crescent-shaped cutouts are taught by Wetsler. It is

Art Unit: 1723

considered that it would have been obvious to one ordinarily skilled in the art at the time of the invention to have the cutouts 4 of Wetsler in the invention of Tuitt, since Wetsler teaches the benefit of "hand holes" in an apparatus that is also used to keep food products below a liquid level in a container. The sheet material is semiresilient (e.g. cardboard) [as in claim 2].

Fig. 3.

The cutouts 4 have a shape to generally fit the profile of a spoon [as in claim 3] and also have the ability to strain [as in claim 4].

FIG. 7

FIG. 4

As shown above the limitations of claim 6 are also taught.

Response to Arguments

7. Applicant's arguments filed 6-14-2007 have been fully considered but they are not persuasive because of the following reasons: The limitations of the amended claims are taught by the combination of Tuitt in view of Wetsler as shown in the office action above.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
